

**Position:** Web Developer

**Location:** Canada Computers head office (Markham, ON)

**Status:** Full-time, Contract (3-month)

**Overview:** As the Web Developer, you will be part of an experienced and friendly Web and Marketing team. This position will require you to not only help, but also lead Canada Computers through a critical transition period for its e-Commerce business. During the initial stages, you will be required to use your advanced CSS, HTML, JSP and mySQL knowledge to modify a working e-Commerce solution by implementing graphic designs from fellow team members, as well as programming new e-Commerce functionality.

## **Requirements**

**Education:** Related degree, diploma, or certificates from University or Community College.

**Experience:** Previous experience in graphic design and web development, specifically related to e-Commerce. Online or documented portfolio required.

**Skills:** Advanced JSP, HTML, CSS and mySQL skills. Decent graphic design ability and creative skill set. Basic to advanced knowledge of Adobe and Macromedia suits. Flash capability an asset.

**Knowledge:** Computer and retail knowledge/experience an asset.

## **Primary Responsibilities:**

- Coordinating and managing efforts to transition between ecommerce solutions, working with various teams and ensuring implementation and integration of the website and related databases.
- Modifying the GUI using JSP, mySQL, CSS, and designs provided by team members
- Implementing new functionality using JSP and mySQL
- Testing, identifying and developing ways to improve the website

**Closing Date:** March 31, 2009

**Position to Commence:** Immediately
